**Subject:** [External] Notice for development permit hearing-variances

Good afternoon!

This is in regards to development permit number DP-446 regarding multi-family residential 10 units being proposed on Shuswap St SE.

I would like to respectfully suggest that the variance regarding the number of street lights be revised from none included, to the addition of one.

While there is an existing light pole across from the proposed development, given the number of homeless/transient/wandering people in the area, I believe it is important to have at least one more light installed. I would like to see it on the field pole before the corner.

In the photograph (Ortho map) enclosed with the information package, the light could be added to the pole, right where the white vehicle on the road is, / directly across from 1080

Thank you for your time and consideration with this matter.

Sincerely

Kate Bischke
